IILM UNIVERSITY, GREATER NOIDA

INTERNSHIP REPORT PRESENTATION

PROMPT ENGINEERING

Keshar i Nandan Ray

Roll No. 25SCS1003002987 | B.Tech CSE

B.Tech –Compute rScience&Engineering

Keshari Nandan Ray

ABOUT THE STUDENT

Candidate Profile

Roll Number
25SCS1003002987

Institute
IILM U niversity, Greater Noida, UP

Programme
B.TechCSE,Batch 2025–2029

Internship Domain
Prompt Engineering

Duration
2Weeks | August 2026

ABOUT THE PROGRAM

InAmigos Foundation

InAmigos Foundation provided me with the opportunity to work as a Prompt Engineering Intern and gain practical exposure to Artificial Intelligence and Generative AI. The internship focused on understanding how effective prompts can guide AI systems to produce clearer, more relevant, structured, and useful responses.

During the internship, I worked on understanding prompt creation and improvement, including adding context, role, audience, tone, format, specific requirements, and constraints to prompts.

Prompt Engineering

Designing clear and effective AI instructions.

GenerativeAI

Interacting with AI tools and evaluating their responses.

Prompt Improvement

Transforming simple prompts into specific and structured prompts.

PROBLEM STATEMENT

Making AI Responses More Relevant and Useful

Simpleorunclearpromptsoftenproducegenericresponsesbecausetheydonotprovideenough information about the user's objective, context, audience, tone, format, or requirements.

For example: Basic Prompt

“Explain Artificial Intelligence.” This prompt does not specify: Who the explanation is for

How detailed it should be, What language should be used Whether examples are required

What topics should be covered

The internship addressed this challenge through a practical content workflow:

TaskIdentification → Basic Prompt → Response Analysis → Prompt Improvement

PROJECT OBJECTIVES

What the Internship Set Out to Achieve

Prompt Engineering

Understand the fundamentals of effective prompt design.

AI Interaction

Understand how AI responds to natural-language instructions.

Prompt Improvement

Convert simple and unclear prompts into specific prompts.

Context & Instructions

Learn the importance of context and clear requirements.

Role-Based Prompting

Understand how assigning a role can influence AI responses.

Output Control

Specify tone, audience, format, length, and required content.

The Toolkit Behind the Internship

Generative AI Tools

Testing prompts and analyzing AI-generated responses.

Prompt Engineering Techniques

Context, role, audience, tone, format, examples, and constraints.

Microsoft Word

Preparing and organizing internship documentation.

Google Drive

Storing and managing internship-related files

Context

Providing relevant background information.

Role

Defining who the response is intended for.

Audience

Defining whothe response is intended for.

Tone

Specifying professional, friendly, simple, formal, etc.

METHODOLOGY

The 2-Week Learning Journey

1 WEEK

Understanding Prompt Engineering
Learned the fundamentals of Prompt Engineering and its importance in Generative AI.

2 WEEK

Creating Basic Prompts
Created simple prompts for practical tasks.

EXPECTED OUTCOMES

Skills & Capabilities Gained

- Ability to create clearer and more specific prompts.
- Understanding how context influences AI responses.
- Improved ability to communicate requirements precisely.
- Breaking tasks into objectives, requirements, and constraints.
- Practical experience interacting with Generative AI tools.
- Ability to compare and evaluate AI-generated responses.
- Understanding practical applications of AI in academic and professional tasks.

CERTIFICATION

Successfully Completed

Role

Prompt Engineering Intern

InAmigos Foundation

Uniting Minds For Change

CERTIFICATE OF INTERNSHIP

Keshari Nandan Ray

This certificate acknowledges the successful completion of a Prompt Engineering Internship at InAmigos Foundation from 9th August 2026 to 253rd August 2026.

01/09/2026

Date

Ms. Iniya Radhakrishnan
Deputy HR Director
