Batch: 2026–27

CANDIDATE'S DECLARATION

I, Keshari Nandan Ray, hereby declare that the internship report titled “Prompt Engineering at InAmigos Foundation” has been prepared by me as part of the requirements for the award of the degree of Bachelor of Technology in Computer Science and Engineering at IILM University, Greater Noida.

The report presents my learning, activities, observations, and experience gained during my internship as a Prompt Engineering Intern at InAmigos Foundation. I have made sincere efforts to present the work and learning experience accurately. Wherever external references or resources have been used, they have been acknowledged appropriately. I further declare that this report has not been submitted to any other institution for the fulfilment of any degree or diploma requirement. I shall be responsible for the authenticity and originality of the content presented in this report.

Student Name: Keshari Nandan Ray

Roll No.: 25SCS1003002987

Offer Letter

Dear **Keshari Nandan Ray**,

We are pleased to offer you the internship position of **Prompt Engineering** at InAmigos Foundation. Below are the details of your internship:

Duration of Internship: Two Weeks.

Working Hours: The working hours for this internship are flexible, allowing you to adjust according to your availability. You are expected to dedicate a reasonable amount of time to the tasks and responsibilities assigned.

Location: This internship generally allows for remote work. However, if the role requires fieldwork, you will be expected to attend fieldwork at a site near your location.

Responsibilities:

- Your primary role will be related to the field of your chosen internship. All major tasks assigned to you will align with this primary focus. Additionally, you will be expected to:
- Attend team meetings and actively participate in group discussions and activities.
- Complete tasks assigned by your superiors in a timely and efficient manner.
- Ensure that the tasks given to you are completed with the utmost care and responsibility.
- As a secondary responsibility, you will contribute to the organization's fundraising efforts, as this is crucial for your stipend.

Stipend: The stipend for this internship will be 20% of the donation raised by you during your internship period. The stipend is directly linked to the donations raised and may vary accordingly. Please note that while your main tasks will be aligned with your primary internship role, fundraising activities will be an essential part of your responsibilities to ensure the stipend. Fundraising is not a mandatory task for achieving a completion certificate. It is an optional task.

Terms and Conditions:

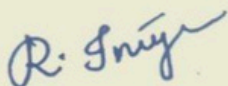

By accepting this internship, you agree to the following:

- InAmigos Foundation may use any content you provide, including reports, presentations, and other work, in a professional manner.
- Maintain professionalism and respect at all times.
- Adhere to all foundation policies and procedures during the internship.
- All work created during the internship will remain the property of InAmigos Foundation, unless otherwise agreed.
- Maintain confidentiality regarding sensitive information.
- Meet deadlines and complete tasks as assigned. Failure to do so may result in termination.
- Inform the foundation if you can no longer continue the internship, providing the appropriate notice.

Confidentiality: You are required to maintain the confidentiality of any information you receive during your internship. You are not permitted to disclose any sensitive or proprietary information related to InAmigos Foundation's operations or donors.

Termination: Either party may terminate this agreement with written notice, subject to the terms agreed upon.

Kindly sign below to confirm your acceptance of this offer and send the signed copy to our foundation's email at hr@inamigosfoundation.org.in

Authorized Signatory
Name: Ms. Iniya R
Designation : Deputy
HR Director

ACKNOWLEDGEMENT

I would like to express my sincere gratitude to everyone who supported and guided me during my internship at InAmigos Foundation.

I am thankful to InAmigos Foundation for providing me with the opportunity to work as a Prompt Engineering Intern and gain practical exposure to the growing field of Artificial Intelligence and prompt engineering. The internship provided me with an opportunity to understand how carefully designed prompts can improve the quality, relevance, and usefulness of AI-generated responses.

I would also like to thank the management and team members of InAmigos Foundation for providing guidance, assigning tasks, and encouraging me to complete my work responsibly and within the expected requirements.

I am grateful to IILM University, Greater Noida, and the faculty members of the School of Computer Science and Engineering for their academic support and encouragement. Finally, I would like to express my gratitude to my parents and everyone who supported me throughout this internship and encouraged me to learn new skills.

 - o 4.5 Scope of the Internship
 - o 4.6 Technologies and Tools Used
 - o 4.7 Prompt Engineering Workflow
 - o 4.8 Methodology
 - o 4.9 Expected Outcomes and Learning
 - o 4.10 Internship Documentation and Communication Proof
5. Bibliography/References

4. PROJECT DESCRIPTION

4.1 INTRODUCTION

This report presents an account of my internship as a Prompt Engineering Intern at InAmigos Foundation. According to the internship offer letter, the internship was for a duration of two weeks, with flexible working hours and generally remote working arrangements.

The primary purpose of the internship was to gain practical exposure to Prompt Engineering; an important area associated with Artificial Intelligence and Generative AI. Prompt engineering involves designing clear, structured, and effective instructions that guide an AI system to generate more relevant and useful responses.

During the internship, I developed an understanding of how the quality of an AI response can be influenced by the quality of the prompt provided to the AI tool. I learned that a prompt can be improved by adding appropriate context, defining the role of the AI, specifying the desired output, setting limitations, and clearly communicating the expected result.

One of the major learning activities involved understanding the difference between simple prompts and improved prompts. For example, a basic prompt such as “Make me a study plan for exams” provides very little context. An improved prompt can specify the number of subjects, available study hours, duration, preferred schedule, revision requirements, and desired output format. This makes the resulting AI response much more specific and useful.

The internship also helped me understand the practical importance of prompt clarity, context, structure, audience, tone, and output requirements when interacting with AI tools.

4.2 ORGANIZATION PROFILE – INAMIGOS FOUNDATION

InAmigos Foundation provided the platform for my internship in the field of Prompt Engineering.

The internship offer letter confirms my selection for the position of Prompt Engineering Intern at InAmigos Foundation.

The internship was structured to provide practical exposure through assigned tasks, participation in team meetings and discussions, and timely completion of responsibilities. The offer letter specifies that interns are expected to participate actively in team activities, complete assigned tasks efficiently, and perform their responsibilities with care.

The organization also provided a flexible working environment, with the internship generally allowing remote work.

As a Prompt Engineering Intern, my learning was focused on understanding how AI tools can be guided through effective prompts. The internship provided an opportunity to explore prompt creation, prompt improvement, structured instructions, and the comparison of AI-generated responses.

The experience helped me connect theoretical knowledge of Artificial Intelligence with practical applications and understand the importance of communicating effectively with AI systems.

4.3 PROBLEM STATEMENT

Generative Artificial Intelligence systems can produce highly useful responses, but the quality and usefulness of those responses depend significantly on how the user communicates the task.

A simple or unclear prompt may produce a generic response because the AI does not have enough information about the user's objective, audience, context, preferred format, or requirements.

For example, asking an AI tool to “write an email” does not specify who the email is for, why it is being written, what tone should be used, or how long the email should be. As a result, the response may not fully satisfy the user's actual requirement.

The problem addressed during the internship was therefore to understand and apply techniques for creating clear, specific, structured, and effective prompts that can generate more relevant AI responses.

The internship focused on identifying the difference between basic prompts and improved prompts and understanding how factors such as context, role, objective, tone, format, length, audience, and specific instructions can influence AI-generated output.

4.4 PROJECT OBJECTIVES

The major objectives of the internship were:

1. To understand the fundamentals of Prompt Engineering.
2. To understand how Artificial Intelligence responds to natural-language instructions.
3. To learn how to create clear and effective prompts.
4. To understand the importance of providing context in a prompt.
5. To improve simple and unclear prompts by adding specific requirements.
6. To understand how role-based instructions can influence AI responses.
7. To learn how to specify the desired format and structure of an AI response.
8. To understand how tone and audience affect generated content.
9. To compare responses generated using basic and improved prompts.
10. To develop practical skills in interacting with Generative AI tools.
11. To understand how prompt specificity can improve the relevance and usefulness of AI-generated responses.
12. To develop problem-solving and analytical thinking through prompt experimentation.
13. To learn how AI can be used for practical academic and professional tasks.
14. To improve communication skills by writing precise instructions.
15. To gain practical exposure to the application of Prompt Engineering in real-world tasks.

4.5 SCOPE OF THE INTERNSHIP

The scope of the internship covered the fundamental concepts and practical applications of Prompt Engineering and Generative AI.

The major areas covered during the internship included:

1. Understanding Prompt Engineering
2. Creating basic prompts
3. Identifying unclear or incomplete prompts
4. Improving prompts using context
5. Adding specific requirements to prompts
6. Role-based prompting
7. Specifying audience and tone
8. Defining output format
9. Setting word or character limits
10. Comparing AI-generated responses
11. Evaluating the usefulness of generated responses
12. Applying prompts to practical tasks

A major focus was understanding how an improved prompt can change the quality of an AI response. The work involved creating simple prompts, developing improved versions, testing both versions using an AI tool, and comparing the resulting outputs.

The internship primarily focused on prompt design and practical interaction with AI systems rather than software development or development of an AI model from scratch.

4.6 TECHNOLOGIES AND TOOLS USED

The internship involved the use of Artificial Intelligence and digital productivity tools for creating, testing, and documenting prompts.

1. Generative AI Tools

Generative AI tools were used to test prompts and observe how changes in instructions affected the generated responses.

2. Prompt Engineering Techniques

Different techniques were applied to make prompts more effective, including:

- Providing context
- Defining the task clearly
- Specifying the target audience
- Assigning a role
- Defining tone
- Setting output requirements
- Providing examples where required
- Setting word or character limits
- Specifying the desired format

3. Microsoft Word

Microsoft Word was used for preparing and organizing internship-related documentation and reports.

4. Google Drive

Google Drive was used for storing and managing internship-related files and documents.

5. Internet and Digital Resources

Online resources were used where required to understand concepts related to Artificial Intelligence, Generative AI, and Prompt Engineering.

4.7 PROMPT ENGINEERING WORKFLOW

The Prompt Engineering workflow followed during the learning activities can be represented as:

Identify the Task

↓

Understand the Requirement

↓

Create a Basic Prompt

↓

Analyze the Limitations of the Prompt

↓

Add Context and Specific Instructions

↓

Define Role, Audience and Tone

↓

Specify Output Format and Constraints

↓

Test the Improved Prompt

↓

Compare Both Responses

↓

Evaluate the Output

↓

Refine the Prompt

1. Identify the Task

The first step was to clearly understand what needed to be achieved using the AI tool.

2. Create a Basic Prompt

A simple prompt was created to observe how the AI would respond when only minimum information was provided.

3. Analyze the Response

The response generated from the basic prompt was reviewed to identify missing information, lack of specificity, or unnecessary generalization.

4. Improve the Prompt

Additional information such as context, purpose, audience, tone, format, length, and specific requirements was added to the original prompt.

5. Test the Improved Prompt

The improved prompt was entered into the AI tool to generate a new response.

6. Compare the Responses

The original and improved responses were compared to understand how additional instructions changed the output.

7. Evaluate the Result

The final response was evaluated based on relevance, clarity, completeness, organization, and usefulness.

8. Refine the Prompt

If necessary, the prompt could be modified further to achieve a more accurate and suitable result.

4.8 METHODOLOGY

The internship methodology involved a practical and iterative approach to understanding Prompt Engineering.

Step 1 – Understanding Prompt Engineering

The first stage involved understanding the concept of Prompt Engineering and its importance when working with Generative AI tools.

Step 2 – Creating Basic Prompts

Simple prompts were created for practical tasks such as study planning, professional email writing, explaining technical topics, social media content, and internship introductions.

Step 3 – Identifying Problems

The generated responses were examined to identify limitations of simple prompts. These limitations included lack of context, generic responses, missing requirements, and unsuitable formatting.

Step 4 – Improving the Prompts

The prompts were rewritten with clearer instructions. Relevant information such as the target audience, purpose, tone, expected length, format, and required content was added.

Step 5 – Testing Both Versions

Both the original and improved prompts were tested using an AI tool. The resulting responses were collected for comparison.

Step 6 – Comparing the Responses

The responses were compared to determine how the improved prompt affected the AI output.

Step 7 – Documenting the Learning

The original prompt, improved prompt, generated responses, and observations were organized as part of the internship work.

PROMPT IMPROVEMENT EXAMPLES

Example 1 – Study Planning

Basic Prompt

“Make me a study plan for exams.”

Improved Prompt

“Create a 7-day study plan for a college student preparing for semester exams. The student has 4 subjects and can study 6 hours per day. Divide each day into morning, afternoon, and evening sessions. Include revision, practice questions, short breaks, and one final revision session. Present the plan as a simple table with Day, Time, Subject, and Task columns.”

Observation

The basic prompt produced a general study plan, while the improved prompt produced a more structured and personalized study schedule because it included the duration,

number of subjects, daily study time, sessions, revision requirements, and output format.

Example 2 – Professional Email

Basic Prompt

“Write an email to my professor.”

Improved Prompt

“Write a polite and professional email to my college professor requesting a 2-day extension for an assignment because of overlapping examinations. Keep it between 100 and 130 words. Use a respectful tone, include a clear subject line, briefly explain the situation, apologize for the inconvenience, and promise to submit the assignment by the new deadline.”

Observation

The improved prompt resulted in a more professional and specific email because it clearly explained the purpose, situation, tone, word limit, and required information.

Example 3 – Explaining Artificial Intelligence

Basic Prompt

“Explain artificial intelligence.”

Improved Prompt

“Explain Artificial Intelligence (AI) to a first-year college student who has no technical background. Use simple language and one everyday example. Explain what AI is, how it learns from data at a high level, where it is used, and one limitation. Keep the explanation under 250 words and use short headings.”

Observation

The improved prompt generated a beginner-friendly explanation because it defined the audience, language level, example requirement, topics to cover, word limit, and structure.

Example 4 – Social Media Caption

Basic Prompt

“Write a caption for my college event.”

Improved Prompt

“Write three Instagram caption options for a college innovation event organized by the Institution's Innovation Council (IIC). The event focused on creativity, problem-solving, and student entrepreneurship. Keep each caption under 40 words, make it energetic but professional, and include 3–4 relevant hashtags. Do not use slang.”

Observation

The improved prompt produced multiple targeted captions with an appropriate tone, length, hashtags, and event context.

Example 5 – Internship Introduction

Basic Prompt

“Write about my IIC experience for an internship.”

Improved Prompt

“Write a concise internship-application paragraph in first person about my experience as an active member of my college's Institution's Innovation Council (IIC). Mention that I actively participated in IIC activities and successfully conducted 5 college events. Highlight skills such as event management, teamwork, communication, coordination, leadership, and problem-solving. Keep it under 500 characters and use a confident but professional tone.”

Observation

The improved prompt generated a more relevant internship introduction because it provided specific experience, skills, purpose, perspective, tone, and character limit.

4.9 EXPECTED OUTCOMES AND LEARNING

The internship provided valuable learning outcomes related to Artificial Intelligence and Prompt Engineering.

1. Understanding of Prompt Engineering

I developed a basic practical understanding of Prompt Engineering and its importance in Generative AI applications.

2. Improved Prompt Writing

I learned how to transform simple instructions into clear and specific prompts.

3. Better Communication

Writing prompts helped me improve my ability to communicate requirements clearly and precisely.

4. Understanding of Context

I learned that providing sufficient context can significantly improve the relevance of AI-generated responses.

5. Structured Thinking

Prompt creation encouraged me to break a task into objectives, requirements, constraints, and expected outcomes.

6. AI Tool Interaction

The internship provided practical exposure to interacting with Generative AI tools and evaluating their responses.

7. Critical Evaluation

I learned to compare AI outputs and identify whether the response actually satisfied the requirements of a prompt.

8. Creativity

Prompt improvement encouraged creative thinking because the same task could be approached using different instructions and structures.

9. Problem-Solving

I learned how to identify weaknesses in an AI response and modify the prompt to address those weaknesses.

10. Professional Development

The internship helped bridge the gap between academic learning and practical applications of Artificial Intelligence.

4.10 INTERNSHIP DOCUMENTATION AND COMMUNICATION PROOF

The internship offer letter confirms my appointment as a Prompt Engineering Intern at InAmigos Foundation. The document specifies a two-week internship duration and flexible working arrangements.

The responsibilities mentioned in the offer letter include attending team meetings, participating in group discussions and activities, completing assigned tasks in a timely manner, and carrying out responsibilities carefully.

The offer letter also specifies professional conduct, adherence to organizational policies, confidentiality, and meeting assigned deadlines.

Copies of the internship offer letter, completion certificate, task submissions, screenshots, communication records, and other relevant internship evidence may be attached to this section as supporting documentation.
